Subject: Preservation Commission

Based upon the information that has been provided, there are some red or at least yellow flags that will prevent individuals from approving (voting) for a Preservation Commission. It would be much easier to vote with confidence to approve a Commission if the Commission and Town Council had the *proposed guidelines* determined BEFORE for voting for the creation of a Commission (this is requiring blind faith the Commission and Council with uphold what is perceived vs what *guidelines that will be* determined).

Based on the limited information, the intent (by blind faith) - we are in support for the creation of a Preservation Commission.
