### **Wastewater Department bringing sewer to portions of Oak Street**

Among the 2020 Zionsville Wastewater Department projects is the new Oak Street sewer. This sewer will be located on the north side of Oak Street and will extend west of Cooper Road traveling east to just west of Irish Hill.

All residents along the side streets of Oak Street who are in the direct location of the sewer project are being considered for sewer. This includes residents as far west as 800 East and as far east as 950 East. As a first step, the Wastewater Department is assessing interest and asking residents in the area to complete a survey. The Town needs greater than 50% buy in from the neighbors to run sewer down a street and all neighbors will be asked to contribute in the cost. However, residents will not be forced to connect.

[Residents in this area can access the survey here.](#)

Once survey responses are captured, the Wastewater Department will begin reaching out to residents with more details including timeline and costs.
