HIGHEST DAILY FLOW	1.269 MG	2.08 MG
AVERAGE DAILY FLOW	0.934 MG	0.909 MG
PRECIPITATION	4.1 in	3.3 in
NPDES VIOLATIONS	0	0
PERCENT FLOW CAPACITY	47%	45%

ADDITIONAL COMMENTS:

- Merrell Bros., Inc. finished cleaning out the solids in Polishing Pond #1. The residual solids were transported and disposed of at their regional facility in Kokomo, IN. Earth Resources, Inc. is scheduled to grub, clear, and re-shape the pond before mixing in a new bentonite clay liner that will finish the project.
- The third quarter budget report was provided to the Town Council. While one line item has seen greater than normal expenses the year end expenses are projected to be within budget.
- The proposed 2013 Budget for the Wastewater Department was provided to the Town Council for consideration. The amount requested for 2013 is \$2,361,240 and is a reduction of \$93,195 of what was approved for the 2012 Budget. The majority of that reduction is from fewer capital outlays in the 400 series line items.
