

ZIONSVILLE WASTE WATER MONTHLY REPORT

	<u>AUGUST 2010</u>	<u>AUGUST 2009</u>
TOTAL FLOW	25.54 million gallons	26.00 million gallons
HIGHEST DAILY FLOW	1.03 million gallons	1.04 million gallons
AVERAGE DAILY FLOW	0.824 million gal/day	0.839 million gal/day
PRECIPITATION	0.36 in	3.05 in
NPDES VIOLATIONS	0	0

ADDITIONAL COMMENTS:

- The 2010 Sewer Project was completed in August. The contractor, Insituform Technologies, Inc., finished their portion of re-lining the sewers along Hawthorne, South Fourth, and West Sycamore Streets and then the manholes were rehabilitated by Sprecra Tech shortly there after.
- Work continues on the Zionsville Road Sewer Project. The boring work going along the west side of Zionsville Road is ongoing but is proceeding slowly due to poor soil conditions. Service line connections to the low pressure force main are being installed and work has begun on the south portion of the trunk sewer. Problems with the boring may make the final completion date of October the 26th not to be met.

Respectfully submitted,

Dennis Mackey
W.W. Dept. Superintendent
