STREET AND STORMWATER DEPARTMENT REPORT FOR THE MONTH OF MARCH, 2015

1. **STORMWATER PERMIT ACTIVITIES**

- a. Twenty five (25) stormwater pollution prevention plan inspections were conducted at permitted construction sites.
- b. Six (6) Stormwater Individual Lot Permits were issued for new residential construction projects.
- c. Completed updates of the Stormwater Pollution Prevention Plans (SWPPP's) and Spill Prevention and Emergency Response Plans for six (6) town-owned facilities including all three (3) Fire Stations, the Municipal Services Building (MSB), Wastewater Treatment Plant and Golf Course.
- d. Additional Municipal Operations Pollution Prevention & Good Housekeeping (MCM 6) activities include:
 - 1) Developed new fueling procedures posters for Fire Station 92, the Golf Course and the Wastewater Treatment Plant.
 - 2) Compiled MSDS sheets for chemical products used by the Street and Stormwater and Parks Departments and posted in a binder at the MSB.
 - 3) Developed Standard Operating Procedures for 6 required maintenance and pollution prevention activities.
- e. Presented water quality information to the Zionsville Leos Club using the White River Alliance's (WRA's) storm drain model and "drop in the bucket" demonstrations. Twenty five (25) children and six (6) adults attended the presentation.
- f. Contracted for the sweeping of curbed roads in Zionsville which is scheduled for April 6th through April 10th. This is a "spring cleaning" effort which removes debris from roads that has accumulated over the winter and prevents the material from being washed into storm sewer drains and local waterways.
- g. Participated in the coordination of and presented at a regional contractor workshop hosted by the WRA. 152 people attended the event, 89 of which sat for testing on a recently developed contractor training and certification program for construction site stormwater pollution prevention.

h. The Indiana Department of Environmental Management conducted an informal compliance visit on March 18th to evaluate the town's construction stormwater pollution prevention program (MCM 4). Though no formal report will be issued from the visit, IDEM's assessment of the town's program was favorable.

2. STORMWATER PROJECTS AND DRAINAGE

No activity.

3. ADA/SECTION 504 COMPLIANCE

A draft of the ADA Transition Plan has been submitted by the consultant for staff review. Several items to correct were noted, and the consultant is amending the draft prior to introduction before the Town Council for adoption.

4. 106TH ST. AND MAIN ST./ZIONSVILLE RD. SIGNAL PROJECT

This project reached substantial completion on March 12th and the signal is operational. All items have been provided and installed, and a punch-list created prior to final payment and release of retainage.

One pedestrian crossing call button was found to be defective, and a replacement has been ordered. It is expected that this function will be fully active within two weeks.

5. FORD RD. ROUNDABOUT

Utility relocation work is ongoing by Duke Energy, Vectren Gas and Citizens Water prior to the construction of the project. The construction project is planned to be let on April 2nd with a 3:00 pm bid-opening at the Town Hall. Preliminary construction activities are expected to begin on or about April 13th, at which time the entrance into the Village Walk subdivision will be permanently closed; however Bloor Lane will remain open to traffic until school lets out on June 5th. After this time, Bloor Lane will be closed to traffic until the roundabout opens on or about August 10th, prior to school starting again in the fall. During the project, Ford Rd. will remain open to through traffic for most of the time with the occasional short closure to dig storm sewers under the road. Advanced notice will be given any time Ford Rd. is to be fully closed.

6. 106th St. Improvement Project/Lids Entrance

A bid opening was held Thursday, March 19th for the 106th St. Improvements project, which includes the two entrances into the Lids project, as well as the eastbound left turn lane into the future Creekside Park. All improvements on the north side of 106th St. were eliminated from the project.

Five (5) contractors submitted bids:

Contractor	Amount
Calumet	\$330,550.00
Globe Asphalt	\$366,822.25
Crider & Crider	\$375,244.20
E&B Paving	\$378,000.00
Rieth-Riley	\$397,800.00

The lowest responsive and responsible bidder was under the engineer's estimate and the project is therefore awarded to Calumet Civil Contractors. Recent information from INDOT relayed observed spike in construction cost prices routinely at or above the 20% of the engineers' estimates, therefore it was fortunate that this project is able to be sold. All bids were found to be complete and accurate. A Notice of Award has been executed and the contractor is preparing contract documents. A Notice to Proceed and construction activities are expected to be issued and begin on or around April 13th.

7. GENERAL ROAD CONDITIONS AND PAVEMENT REPAIRS

The extended cold temperatures of the past two years have taken a heavy toll on some roadways, most notably CR 800 E., 400 S., and Cruse Rd./CR 600 S. where failing subgrades have led to areas of complete pavement failure. These pavement conditions are being monitored and addressed with temporary measures until a contract is awarded for permanent repairs later this summer. Once all necessary repairs to keep roads in service are identified and cost-estimated, other resurfacing projects will be considered until the budget is exhausted.

8. 2015 HEAVY TRASH

The annual collection of heavy trash in the urban service district has been set for the week of May 11th. This is an opportunity for residents to dispose of non-hazardous household items that are not normally collected with their weekly trash service. Collection will again be on residents' regular trash day during this week. Information and details are posted on the Town's web site (<http://www.zionsville-in.gov/2015/03/2015-heavy-trash-collection-week-of-may-11th/>) and will be provided to the Times Sentinel. Residents may contact the Street and Stormwater Department directly for this information as well.

Since 2009, the town has used an appliance recycling company to collect appliances, including refrigerant-bearing appliances, for heavy trash collection. This eliminated the cost to residents to dispose of said items as they were taken at no charge by the appliance recyclers. As of today, these companies are no longer in existence as it has not proven economically viable, and the town is once again faced with a cost associated with their disposal. In reviewing records, the last year residents had to pay for collection was 2008 when we had 12 appliances. The number of appliances varies each year, but we have not tracked them since 2009 when recyclers became an option. Therefore, upon discussion with the Town Manager given the very low volume of appliances, the service will continue to be offered free of charge to the residents of the urban district with the town absorbing the costs. This decision will be reviewed upon completion of the

service, and the appropriateness of reinstating an appliance disposal fee may be revisited depending on the volume experienced in 2015.

9. 2015 SPRING BRUSH AND LIMB COLLECTION

The spring round of brush and limb collection for Zionsville residents in the urban district has been scheduled for the weeks of April 20th and April 27th. The specific schedule has been posted to the Town's web site (<http://www.zionsville-in.gov/wp-content/uploads/2011/03/2015-Spring-Brush-Limb-Collection.pdf>) and provided to the Times Sentinel. Residents may contact the Street and Stormwater Department for their specific day of collection, and the schedule is attached to this report.

PUBLIC NOTICE

Spring 2015 Brush & Limb Collection

The Town of Zionsville's Street & Stormwater Department will be providing curbside Brush & Limb Collection **beginning Monday, April 20, 2015**. This service provides Zionsville residents in the Urban district a means to dispose of certain spring pruning and yard debris. We cannot guarantee the collection unless your items are out curbside by 7:30 a.m. on your designated pick-up day.

The limit on size is 6 inches in diameter and smaller. Grass clippings, leaves, decorative grass, vines, stumps, root balls, construction lumber, firewood, and wooden fencing material will **NOT** be collected. Bundling is not required. Limbs up to 6 inches in diameter may be left intact but should be no larger than can be managed by one person.

Monday April 20	Village Area (all) and Starkey Ave.
Tuesday April 21	Sugarbush Hill, Fox Hollow, Woodlands at Irishmans Run, Hunt Club Rd., Clifden Pond, Hunt Club Village, Olde Dominion, Ford Rd.
