# Executive Summary

# Situational Overview & Key Questions

## Situational Overview

Hunden Partners was engaged by the Town of Zionsville to complete a market demand and financial feasibility analysis to determine the gaps and opportunities in the market for the development of new hotel products.

The study examines the current and future supply and demand for hotels and meeting facilities in the local and regional market, evaluates economic and demographic trends, and benchmarks comparable facilities within the relevant competitive set.

Through stakeholder interviews, competitive analysis, and case study review, Hunden developed recommendations for three different scenarios for financial modeling including the number of guest rooms, meeting spaces, and supporting amenities.

### Where you are now

Does the current supply of hotels and meeting facilities in surrounding markets meet the needs of Zionsville?

What types of meetings, conferences, and overnight stays are leaving the market due to lack of appropriate facilities?

### How you stack up

How does Zionsville compare with peer suburban markets in terms of hotel inventory, quality, and meeting space?

Does Zionsville have the leisure, corporate, and group demand drivers to support the development of the hotel and various function spaces?

### The opportunities

What size, type, and mix of guest rooms and meeting space would the Zionsville market support?

What amenities are needed to support the hotel development?

What net new activity would the hotel generate?

### How we get there

How would the Project perform financially under different room count and function space scenarios?

How does the site effect economic impact projections and financial performance?

What funding mechanisms can leverage the Project's financing?

# Stakeholder Feedback & Keys Findings

Hunden conducted interviews with regionally competitive hotels as well as market experts to understand performance trends, market segmentation, and demand challenges. Hunden also engaged Discover Boone County, local business leaders, the Indianapolis Executive Airport, and employees of the Town of Zionsville to assess the needs for additional hospitality and meetings assets within the local and regional market.

These conversations provided insight into unmet demand, competitive pressures, and types of events and travelers that a new boutique hotel in Zionsville could capture.

## Key Findings:

- 1 Upscale/Boutique Hotel Needs**

Zionsville is experiencing steady population and economic growth, creating demand for transient, corporate, and group room nights. Despite this growth and the town's vibrant downtown district, there is currently no hotel property within Zionsville to accommodate rising visitor demand, leading to lost economic impact. This gap presents a clear opportunity to introduce a thoughtfully positioned hotel that can serve the market's growing demand.
- 2 Appropriate Function Space**

Interviews with Discover Boone County and numerous corporations within Zionsville revealed the need for ballroom and meeting spaces for events up to 300 in attendance. The market currently lacks quality meeting space for large group events and smaller corporate meetings, and demand is expected to continue to increase, parallel with population and economic growth within the market.
- 3 Unique Design, Amenities & Brand Affiliation**

Boutique hotels are often unique to their respective destinations, incorporating unique cultural designs and guest amenities within their programming. Amenities such as full-service restaurants with locally influenced concepts, craft cocktail bars, spas, and rooftop/outdoor entertainment areas help create revenue streams within the Project and generate visitation from visitors and residents alike. Affiliation with a major hotel brand family is recommended for shared marketing opportunities and group business lead generation.

# Recommendations: Financial Modeling Scenarios

## The Opportunities

**Scenario Framing:** The Base, Moderate, and Expanded cases outline different sizing options for a boutique hotel, including variations in room and function space. All scenarios are assumed to include a full-service restaurant.

These scenarios establish the framework for financial analysis, which will identify the feasibility gap and illustrate how different sizing impacts overall performance.

|                      | Base Case<br>Scenario 1                             | Moderate Case<br>Scenario 2                         | Expanded Case<br>Scenario 3                         |

# SWOT Analysis

## Where You Are Now

### STRENGTHS

S

- Rapid population and economic growth fueling local transient and corporate hospitality demand
- Limited hospitality supply within vibrant downtown core, supported by walkable amenities
- Alignment with economic development goals and town master planning efforts

### OPPORTUNITIES

O

- Upscale hospitality offering, to drive additional downtown visitation and economic impact to existing businesses
- Event and meeting destination within Zionsville and Boone County for impactful corporate events, weddings, and other community group events

### WEAKNESSES

W

- Unproven upscale local hospitality market
- Site control
- Potential need for costly structured parking

### THREATS

T

- Zoning and community approvals for height limits
- Increasing supply of boutique and upscale properties in northern Indianapolis
- Competitive northern Indianapolis meetings market
- Increasing construction costs for boutique hotel properties

# Economic, Demographic & Tourism Summary

## Residential & Corporate Growth

Zionsville's 38-percent population rise from 2010 to 2025, high incomes, and strong homeownership reflect robust economic essentials. Residential growth is projected to continue by an additional 20 percent through 2030, buoyed by a growing corporate presence and the LEAP Innovation District, in which Eli Lilly has made significant investments.

## Downtown Location & Accessibility

Downtown Zionsville is a major activity node within the town, with a high concentration of walkable, locally-owned restaurants and shops. Downtown Zionsville is also highly accessible from the highly-trafficked I-65 and I-465 interstates but provides limited hospitality offerings.

## Increasing Leisure, Corporate & Group Travel Demand

Residential and economic growth, accompanied by growing demands from leisure and group travelers have increased the need for hospitality and meetings assets. Events searching for accommodations within Boone County are being displaced to surrounding counties with more robust hospitality and meeting supply assets, leading to lost economic impact within the town and county.

Local market area characteristics such as population, demographics, a diversified economy, access, and attractions influence the potential demand for developments as well as the overall attractiveness of an area to a potential visitor or group.

# Population Growth Trends

Zionsville, Indiana, has experienced remarkable population growth, increasing by nearly 40 percent between 2010 and 2025, greatly exceeding state and national averages. Over the same period, Indiana’s population increased by 6.9 percent, and the Indianapolis-Carmel MSA by 17.2 percent. Zionsville’s population is projected to reach nearly 38,000 residents by 2030, which reinforces its position as one of the fastest growing communities in the area.

This population growth is driven by residential development, strong school districts, and increasing corporate activity including headquarters relocations, along with other factors. As the population continues to climb, demand for hospitality, conference, and meeting facilities will only expand, which will allow a hotel development to be well positioned to meet these evolving needs.

| Population and Growth Rates |             |             |             |                |                            |
|-----------------------------|-------------|-------------|-------------|----------------|----------------------------|
|                             | 2010        | 2020        | 2025        | 2030 Projected | Percent Change 2010 - 2025 |
| United States               | 308,745,538 | 331,449,281 | 339,887,819 | 347,149,422    | 10.1%                      |
| Indiana                     | 6,483,802   | 6,785,528   | 6,930,476   | 7,029,724      | 6.9%                       |
| Indianapolis-Carmel MSA     | 1,865,850   | 2,089,673   | 2,186,750   | 2,267,061      | 17.2%                      |
| Boone County, IN            | 56,640      | 70,812      | 80,325      | 87,955         | 41.8%                      |
| Zionsville, IN              | 24,327      | 30,588      | 33,755      | 37,693         | 38.8%                      |

2025 – 2030 Population Growth Rate

# Road & Airport Accessibility

Zionsville, Indiana, is strategically positioned near major transportation corridors, including I-65, I-465, U.S. 32, and U.S. 421, which provide convenient regional access. Located northwest of Indianapolis, the community also offers strong connectivity to downtown as well as nearby suburbs such as Carmel and Westfield. This accessibility enhances Zionsville’s appeal as both a residential community and a destination for future hospitality development.

Vehicle Traffic Volume – Average Cars Per Day

| Roadway  | Cars Per Day |
|----------|--------------|
| I-65     | 42,600       |
| I-465    | 61,100       |
| U.S. 32  | 7,300        |
| U.S. 421 | 30,300       |

## Indianapolis Executive Airport

The Indianapolis Executive Airport is Indiana’s second-busiest business aviation airport.

- Approximately 10,000 operations per year
- Estimated 20% of visitors travel to a hotel

Source: Indianapolis Executive Airport

# Vehicle Traffic Volume

Downtown Zionsville’s surrounding roadways support steady traffic, including 13,100 cars per day on W. Oak Street, 11,200 on Zionsville Road, 11,100 on Sycamore Street, and 5,400 on 106th Street. Downtown Zionsville is connected to I-65 via W. Oak Street to the west and I-465 via Zionsville Road to the south.

A main thoroughfare within the Indianapolis-Carmel-Anderson MSA, I-465 supports roughly 61,100 cars per day near Zionsville Road.

Vehicle Traffic Volume – Average Cars Per Day

| Roadway                             | Cars Per Day |
|-------------------------------------|--------------|
| I-465                               | 61,100       |
| U.S. 421                            | 30,300       |
| W Oak Street                        | 13,100       |
| Zionsville Road (South Main Street) | 11,200       |

# **Local Hotel Market Analysis & Meeting Space Supply**

# Local Competitive Hotel Supply

The adjacent map and the table below outline the local hotel supply within a five-mile radius of Downtown Zionsville. The local market includes 39 hotels for a combined 3,809 rooms. There are no Luxury hotels and only one hotel in the Upper Upscale class. Most of the local supply falls within the Upper Midscale category. Two midscale Tru by Hilton hotels are planned within this radius.

Zionsville’s surrounding area has experienced steady population growth and higher-than-average household incomes. These demographic trends suggest an underserved lodging market at the higher end, given the absence of Upper Upscale or Luxury accommodations within the local supply.

Local Hotel Supply (5-Mile Radius)

| Class          | Number of Hotels | Hotels Percent of Total | Number of Rooms | Rooms Percent of Total |
|----------------|------------------|-------------------------|-----------------|------------------------|
| Luxury         | 0                | 0.0%                    | 0               | 0.0%                   |
| Upper Upscale  | 1                | 2.6%                    | 221             | 5.8%                   |
| Upscale        | 5                | 12.8%                   | 472             | 12.4%                  |
| Upper Midscale | 14               | 35.9%                   | 1,267           | 33.3%                  |
| Midscale       | 8                | 20.5%                   | 761             | 20.0%                  |

| Independent    | 5                | 12.8%                   | 454             | 11.9%                  |
| Total          | 39               | 100%                    | 3,809           | 100%                   |

Source: CoStar

# Local Competitive Hotel Supply Performance

Hunden analyzed the performance of nine competitive hotels using CoStar and STR data. Within the competitive set, occupancy has remained above 70 percent since 2020, demonstrating a strong recovery since Covid-19. While overall occupancy declined slightly in 2023 compared to the prior year, the market still achieved a 72-percent occupancy level, which represents a notably strong performance across the set of hotels. With the introduction of additional room supply in 2024, the market has readily absorbed the new inventory, indicating the depth of demand in the area. The average daily rate (ADR) has increased consistently, with a compound annual growth rate of nearly four percent since 2019. Revenue per available room (RevPAR) increased to \$98 in 2024 and has improved consistently since the pandemic, which was driven by the combination of high occupancy and ADR. The historical performance of the competitive set of hotels indicates that the market can likely support additional hotel rooms.

| Local Competitive Hotel Supply Performance |                             |                       |                  |                |                    |        |
|--------------------------------------------|-----------------------------|-----------------------|------------------|----------------|--------------------|--------|
| Year                                       | Annual Avg. Available Rooms | Available Room Nights | Room Nights Sold | Occupancy Rate | Average Daily Rate | RevPAR |
| 2019                                       | 706                         | 257,558               | 189,825          | 74%            | \$115              | \$84   |
| 2020                                       | 800                         | 292,068               | 145,619          | 50%            | \$87               | \$43   |
| 2021                                       | 817                         | 298,237               | 207,855          | 70%            | \$105              | \$73   |

| 2023                                       | 915                         | 333,975               | 239,908          | 72%            | \$131              | \$94   |
| 2024                                       | 999                         | 364,635               | 261,086          | 72%            | \$137              | \$98   |

Source: STR

# Local Set Heat Charts

The adjacent tables detail the performance of the competitive set by month and day of week from August 2024 to July 2025, offering insight into seasonality and daily performance.

ADR was strongest during the weekend periods, with rates peaking in summer months. Occupancy followed a similar pattern, with the highest levels occurring Fridays and Saturdays. During the summer months, the competitive set experienced exceptionally high occupancy rates, reaching approximately 87 percent in July 2025.

This pattern highlights the dominance of transient travel, which typically drives occupancy from Fridays to Saturdays. The pattern also suggests the market could support additional hotel development.

| ADR by Day of Week and Month   Zionsville, IN<br>August 2024 through July 2025 |              |              |              |              |              |              |              |       |

# **Case Study Analysis & Site Analysis**

# Case Study Hotels

## Room, Function Space & Site Analysis

Hunden identified a comparable set of downtown boutique hotels in similar-sized markets to analyze number of rooms compared to total function space, site configurations, and number of floors per property.

Each hotel required roughly 0.5 acres, absent the property’s parking, and contained a maximum of roughly 4,750 square feet of function space.

| Property        | Location             | # of Keys | Total Function Space | Site Acreage | # of Floors |
|-----------------|----------------------|-----------|----------------------|--------------|-------------|
| Hotel Vermont   | Burlington, VT       | 125       | 2,400                | 0.49         | 6           |
| Hotel Elkhart   | Elkhart, IN          | 93        | 4,748                | 0.56         | 10          |
| Adelphi         | Saratoga Springs, NY | 65        | 3,500                | 0.49         | 4           |
| The Doyle Hotel | Charlottesville, VA  | 80        | 3,503                | 0.64         | 4           |

## **Recommendations & Next Steps**

# Recommendations: Financial Modeling Scenarios

## The Opportunities

**Scenario Framing:** The Base, Moderate, and Expanded cases outline different sizing options for a boutique hotel, including variations in room and function space. All scenarios are assumed to include a full-service restaurant.

These scenarios establish the framework for financial analysis, which will identify the feasibility gap and illustrate how different sizing impacts overall performance.

|                      | Base Case<br>Scenario 1                             | Moderate Case<br>Scenario 2                         | Expanded Case<br>Scenario 3                         |
|----------------------|-----------------------------------------------------|-----------------------------------------------------|-----------------------------------------------------|
| Room Count           | 80                                                  | 100                                                 | 120                                                 |
