For Immediate Release:

March 31, 2023

Oak Street and CR 800 East roundabout project road closure June 1 through Sept. 1

Construction work for the roundabout at Oak Street and CR 800 East (Kissell Road) is scheduled to begin on April 3, 2023. The project will necessitate a full closure of Oak Street, which is currently scheduled to occur between **June 1, 2023 and September 1, 2023**.

The official detour route includes:

- Oak Street detour: 875 East, 300 South, Albert S. White Drive/400 South, South Main Street/650 East
- CR 800 East detour: 550 South, Marysville Road/850 East, Hunt Club Road

After the road is re-opened to traffic, work will continue with final completion currently scheduled for November 29, 2023.

The roundabout will replace the existing traffic signal located at this intersection. This traffic signal was installed in 2017 as a temporary measure to assist with traffic management of the intersection until a roundabout could be designed, funded and constructed. Over the last several months, utilities within the area have been relocating their facilities in preparation for the road construction work.
